EDUCATION

Bachelor of Applied Science

Queen's University

Sept. 2017 – Apr. 2022

Kingston, ON

- Major in Mathematics and Engineering with Professional Internship, Option in Computing and Communication
- Relevant Coursework: Probability Data Structures Signals and Systems Control Theory Object-Oriented Programming Embedded Systems Economics

EXPERIENCE

Tax Analyst

Deloitte

May 2020 – Present

Waterloo, ON

- Professional Experience Year (PEY) between 3rd and 4th year of university.
- Advised and supported companies in procuring government investment incentives for their scientific research and experimental development (SRED) activities, strategic initiatives, and technical projects.
- Collaborated with technical teams to build technical reports and presentations to demonstrate technological developments for SRED claims within technology, media, and telecom industries.
- Technologies Used: MS Word MS Excel MS PowerPoint

Signal Processing/ML Engineer

Merlin Neurotech

Sept. 2019 – Mar. 2020

Kingston, ON

- Alpha-Light:** Developed Python scripts to configure elements in a smart home environment using the Internet of Things (IoT) and deconstruct neural oscillations from real-time raw EEG signals.
- Blink-Detection:** Cleaned, filtered, and labeled raw EEG signal data to augment original research dataset for enhanced performance. Developed a Sequential 1 Dimensional Convolutional Neural Network (CNN) trained on the processed dataset of EEG signal intervals to detect blinks with a peak accuracy of 95%.
- Packages Used: Numpy Pandas TensorFlow Keras SciPy Scikit-Learn

Data Scientist

Beta Lab

Sept. 2019 – May 2020

Kingston, ON

- Meeting Minutes:** Developed an unsupervised extractive model using sentence embedding and feature-space analysis techniques to summarize natural language texts.
- Articles:** Developed, wrote, and edited tutorials and articles relating to various data science topics.
 - Article 1: Web Scraping with Python.
 - Article 2: Introduction to Artificial Neural Networks.
- Packages Used: NLTK TensorFlow Keras Scikit-Learn BeautifulSoup

TECHNICAL SKILLS

Languages

Python SQL MATLAB C Java HTML CSS Octave Assembly

Python Packages

Numpy Pandas Matplotlib TensorFlow Keras Scikit-Learn SciPy NLTK BeautifulSoup

Other Technical Skills

GitHub LaTeX SolidWorks Technical Writing MS Word MS Excel MS PowerPoint

ACCOMPLISHMENTS

Tree Planting

Haveman Brother's Forestry Services

- Planted a total of 311,780 trees during two summers (97 days) as a tree planter in Northern Ontario.
- Averaged 2748 trees per day in my first season and 3731 trees per day in my second season.

QUBE Case Competition Winner

Queen's University Business and Engineering

- Took first place in a team of four participants at the QUBE 2020 Consulting Case Competition.
- Performed and presented financial analysis on historical business and market data to identify trends and provide business recommendations.

Machine Learning Certificate

Stanford (Coursera)

- Introduced to machine learning, datamining, and statistical pattern recognition concepts including supervised and unsupervised learning algorithms, neural networks, machine learning best practices, and industry applications.
- Completed projects involving anomaly detection, recommender systems, principal component analysis, and support vector machines.
